DETAILED ACTION

1. It is noted that USPTO has received an oath and declaration and a response to pre-exam formalities notice, both are filed on January 5, 2004. **Claims 1-16 with a total of five independent claims (Claims 1, 2, 3, 4 and 5) are now pending.** An action follows.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. **Claims 1, 4, 6, 8, 11 and 14-16**, drawn to an **aromatic compound** and its polymer having both fluoroalcohol group(s) and **-(OR³)_m** group(s) wherein **-OR³ is hydroxyl, alkoxyl or aryloxyl**, classified in class 526, subclass 346.

II. **Claims 2, 5, 7, 9 and 12**, drawn to an **alicyclic compound** having both fluoroalcohol group(s) and **-(OR³)_m** group(s) wherein **-OR³ is hydroxyl, alkoxyl or aryloxyl**, classified in class 526, subclass 242.

III. **Claims 3, 10 and 13**, drawn to an **alicyclic compound** having both fluoroalcohol group(s) and **-(R⁴)_m** group(s) wherein **R⁴ is hydrogen atom, alkyl or aryl**, classified in class 526, subclass 308.

Art Unit: 1713

3. The inventions are distinct, each from the others because of the following reasons:

Inventions I, II and III are all unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different same functions, or different effects (MPEP § 806.04, MPEP § 808.01). Although the compounds in all invention groups may use the same or similar repeating fluorinated alcohol units, they are actually quite different compounds due to the main difference on aromatic or alicyclic structure as well as the substitution of -OR or -R linkers. The process of making is unique and thereby not interchangeable.

4. In the instant case **Group I** was drawn to an aromatic fluoroalcohol and its derivative with extra -OR group(s), **Group II** was drawn to an alicyclic fluoroalcohol and its derivative with extra -OR group (s), while **Group III** was drawn to an alicyclic fluoroalcohol and its derivative with extra -R group (s). Additionally, the compound in Group I may be further related to polymerizable monomeric compound. Therefore, the scope of the claims, i.e., the metes and boundaries are distinct.

5. Because these inventions are distinct for the reasons given above and the search required for each group is not required for other groups have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1713

6. It is noted that no phone call was made to **J. D. Evans (tel: 202 624-2500)** by the examiner due to the complexity, for instance five independent claims. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

8. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Henry S. Hu whose telephone number is **(571) 272-1103**. The examiner can be reached on Monday through Friday from 9:00 AM –5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu, can be reached on (571) 272-1114. The fax number for the organization where this application or proceeding is assigned is (703) 872-9306 for all regular communications.
